- REACT
- TYPESCRIPT
- TAILWIND
- MATERIAL UI
- REDUX
- GIT

SOFT SKILLS

- PROBLEM-SOLVING
- TEAMWORK
- LOYALTY
- COMMUNICATION
- ADAPTABILITY
- TIME MANAGEMENT

EDUCATION

GOIT Full-stack Developer Course

2024

I completed the GOIT Full-Stack Developer course, gaining strong skills in HTML5, CSS, JavaScript, React, and Node.js. The program focused on practical projects and real-world applications, preparing me to build dynamic frontend interfaces and efficient backend solutions.

Faculty of Automation and Computer Science

2018

I completed one year of studies in Automation and Computer Science at Ștefan cel Mare University, where I gained foundational knowledge in programming, mathematics, and systems engineering, which strengthened my problem-solving skills and technical understanding.

LANGUAGES

English

ABOUT ME

Passionate about web development with a strong foundation in both frontend and backend technologies. I have experience working with HTML5, CSS, JavaScript, React, Material UI, Tailwind CSS and Figma. I'm always eager to learn new tools and techniques to enhance my skills. I aim to create efficient, user-friendly applications that provide real value to users and businesses.

WORK EXPERIENCE

GOIT Full-Stack Developer Course

Role: Full-Stack Developer

2024-2025

• TEAM PROJECTS

Money Guard App

Technologies used:

- **Frontend:** React, Redux Toolkit, Redux Persist, React Router DOM
- **UI/UX:** Formik, Yup, React-Responsive, React ChartJS, React-Daterangepicker

Description: This app is a personal finance management application designed to help users track their **income**, **expenses**, and **savings** with ease. The app provides an intuitive **dashboard** where users can quickly see their **financial overview**, categorize **transactions** and **monitor spending habits**.

Filmoteka

Technologies used: HTML, CSS, JavaScript, Local Storage

Description: I built a web app that displays popular movies on the homepage, allowing users to interact with each movie by opening a **modal**. Users can **add movies** to either a **"queue"** or **"watched"** list, which are stored in **local storage**. I was responsible for implementing the functionality to manage these lists and display them when a button is clicked. Additionally, I integrated a **dark mode** feature, allowing users to toggle the page theme according to their preferences.

• INDIVIDUAL PROJECTS

BPS (BIL-PAVE-SOLUTIONS) - REAL PROJECT

Technologies used: React, Vite, TypeScript, Material UI, EmailJS, Cloudflare

Description: Bil Pave Solutions (BPS) is a professional company website built to showcase paving **services** and **completed projects**. The platform was designed with a strong focus on **performance**, **responsiveness**, and **SEO optimization** to help the business gain visibility online and attract new clients.

Health App

Technologies used: React, Vite, TypeScript, Tailwind CSS

Description: Personal wellness and nutrition **tracking** platform that helps users monitor their **daily food** intake, **calories**, and **health progress**. The application is designed to support individuals in achieving their **health goals** by offering **intuitive tools** and **actionable insights**.
