QA ENGINEER WITH FRONT-END DEVELOPMENT BACKGROUND

SUMMARY

Detail-oriented QA Engineer with a Front-End Development background and hands-on experience in manual testing, bug reporting, API testing, and UI validation. Experienced working with React-based applications and testing responsive web interfaces across devices. Passionate about software quality, usability, and continuous improvement.

CORE SKILLS

QA SKILLS (MANUAL & AUTOMATION): Test Cases, Bug Reporting, Jira, Zephyr, Qase.io, Postman, Agile/Scrum, STLC/SDLC, Api Testing

FRONT-END SKILLS: HTML5, CSS3, JavaScript ES6+, React, Typescript, DevTools, Tailwind, Materials UI

TOOLS & ENVIRONMENTS: Git, Github, Docker, PostgreSQL, VS Code, Trello

PROJECTS & EXPERIENCE

MANUAL TESTING PORTFOLIO (E-COMMERCE & WEB APPS)

- **Sweet Shop (E-commerce):** Tested checkout flows, product pages, and user interactions. Created **test cases** in **Qase.io** and reported **UI/UX bugs** and **functional issues**.
- **Agile Travel (Booking Platform):** Tested booking and payment feature, **validating forms**, user flows, and **responsive behavior** across devices.
- **To-Do List (Task Management):** Performed **smoke** and **sanity testing** to verify core features and task management functionality, including **edge cases**.
- **Key Results:** Created **test cases**, identified **defects**, and documentation testing results through test plans and **bug reports** in my portfolio- **reut-mihai.pages.dev**

Adapted full-stack projects:

BPS (Bil-Pave-Solutions) - bps-paving.com

- Developed and maintained a production website using **React** and **Typescript**, focused on **responsiveness**, performance, and **SEO optimization**.
- Performed manual UI/UX testing across multiple devices and screen sizes to identify layout and usability issues.

Money Guard App - reutmihai.github.io/Money-Guard

- Built a financial dashboard using React and **Redux Toolkit** for transaction and state management
- Tested income and expense flows, **validating data** handling, user interactions, and **responsive behavior**

WORK EXPERIENCE

GOIT Full-stack Developer Course (2024)

Faculty of Automation and Computer Science (1 Year)
